

A man with a beard, wearing a light blue button-down shirt and a white VR headset, is looking down at a large, translucent 3D model of a car wheel. The model is composed of many thin, overlapping layers and is surrounded by a cloud of small, colorful dots (orange, yellow, green, blue). In the background, a microscope is visible on the left, and a large, curved industrial structure is on the right. The overall scene is set in a factory or laboratory environment.

Our promise to you

# Agility and Ingenuity Together

Bringing Siemens the power of **true enterprise cloud** to enable vital standardisation and flexibility, continuous innovation and absolute security

# What we will bring Siemens in SHERPA#2

The strongest, most complete, resilient and flexible platform for your current and future business

## MATURE, TRUE ENTERPRISE CLOUD

Designed over 10 years, using modern best practice, for global enterprises

## DATA DRIVEN BUSINESS CAPABILITY

Embedding insight across your global organisation

## ENABLING YOU TO ACHIEVE A DYNAMIC OPERATING MODEL

Realising value at every stage, giving you even greater control

# Our proposition to Siemens

## Oracle will deliver agility and ingenuity together for and with Siemens

**The power of true enterprise cloud enabling data-driven business capability, and a truly dynamic operating model.**

A platform built from the ground up, mature, ready to go. Created over **10 years and \$56billion investment** to give enterprises competitive advantage through data. A platform that helps you:

- Drive Intelligent **standardisation** and automation to achieve new levels of efficiency through **85% common processes**.
- **Configure and extent new functionality from common processes**. So operating companies and global businesses can carry out unique tasks or deliver differentiated capability easily.
- Rapidly onboard new acquisitions and maximise their value. Divestments easy to carve out.
- We constantly innovate, so new capability augments your business performance.
- We control all levels of the technology delivery from the CPU right through to the application – this is unique in the technology world and ensures levels of security way beyond our nearest competitor.
- Through Enterprise Cloud we will support Siemens to create a business-enabling, data-driven cloud platform to maximise performance. Designed to deliver strength, flexibility, innovation and security through data. To ensure your agility and unleash your ingenuity now and into the future.

# What do we mean by...

## Standardisation

- More than 1000+ pre-built applications
- Delivering global data-definition and business process standardisation
- Meaning comprehensive oversight, governance, control and efficiency
- All delivered with global compliance.

## Flexibility

- Configure and extend processes and functions to accommodate business specific requirements
- All configurations and additions automatically reflected in the data model allowing seamless information flow.

## Innovation

- We deliver innovation with a regular cadence that does not disrupt your day to day operations
- This means you can constantly improve business efficiency without disruption and associated cost.

## Security

- The highest level of security delivered by control over each layer of the technology stack
- Including autonomous data management allowing proactive response to ongoing, changing threat.

# Delivering capability aligned to your requirements

## VELOCITY to reach TARGET STATE SOONER

Oracle Enterprise Cloud is ready to go now.

Incremental delivery allows strong risk management and the opportunity to reach target end state in advance of 2025.

## Balancing STANDARDISATION and INDIVIDUALITY

Highly standardised platform.

Configurable & extendible functions and applications deliver to individual operating company needs fast.

Because it's all part of a modular platform, no matter how individual functions are added, your platform stays integrated.

## Risk-mitigated DISRUPTIVE THINKING

Automatically adding disruptive and innovative enhancements – with zero impact to you.

Oracle takes the risk and investment burden. You take the advantage of disruptive technology integrating it seamlessly into your business.

## ONE unified PLATFORM

Building a single ERP backbone - designed with lean business process and rapid deployment capability.

No monolithic design. No heavy customisation - backbone remains agile, innovative – and secure.

## Clear compelling case for INVESTMENT IN ERP

Delivering in stages to show continuous, rapid ROI incrementally.

Delivering agile ERP backbone, adding functions as part of Enterprise Cloud, in line with changing needs and compelling business cases for change.

# Where will our approach take you?

## From an existing enterprise landscape...

Built on 20-30 year old code base

With different platforms everywhere

With slow, inefficient and error-prone integration

Where security around the big amount of different ERP systems is a huge burden

Where customization of processes leads to a disunited business

Where you can't drive learning from insight

With manual updates causing slowdown, cultural issues and security exposure

With inefficient, customized and complex processes causing escalating costs

## To a new world...

Which is designed from scratch for next-generation business

Giving a single, consistent data-driven information management platform

Which integrates automatically, so everything talks to each other

In which security is inherited seamlessly from the CPU layer up to the whole technology stack

Which puts in place flexible, configurable and extendible functions from one global data model

Where you can use data science across the business to get real insight

With automated updates, consistent innovation, no integration shock – and Autonomous Data Management that drives and secures itself

With a flexible enterprise cloud built from the ground up, giving you known cost management

# Oracle Enterprise Cloud Journey – Light-years ahead

**2007**

‘Reinvent  
enterprise  
applications’

**2019**

**1000+ applications**  
**29 Million** weekly  
active users  
**57 Billion+** daily  
business transactions

**\$56bn**

invested

## Built with Modern Best Practice

Standardised, configurable, extendible

## Built from ground up

Single global platform  
Millions of lines of code rewritten

## Built to be entirely secure

From data center to chip  
Encrypted at rest and in motion

## Built to drive itself

Autonomous Data  
Unique, unrivalled data capability.  
Self-driving, self repairing, self-securing

## Oracle Cloud Scale

# A complete, robust, flexible Enterprise Cloud

Application Extension required

Applications out of the box capability *plus already planned roadmap*

Common for all applications

Data Management

# Deep Dive Fit – Early Assessment (End March '19)

Our initial product fit assessment after reading RFI before Deep Dive start

Out of the box capability

We are continuing to accelerate what we deliver, extending functions to meet your end state

**20** Oracle  
Cloud releases  
in 5 years

**\$5-6bn** / year  
on new  
enhancements

**40%** of enhancements  
are based directly on  
customer feedback

By EOY 2019 70% complete

By EOY2020 this will be 100%

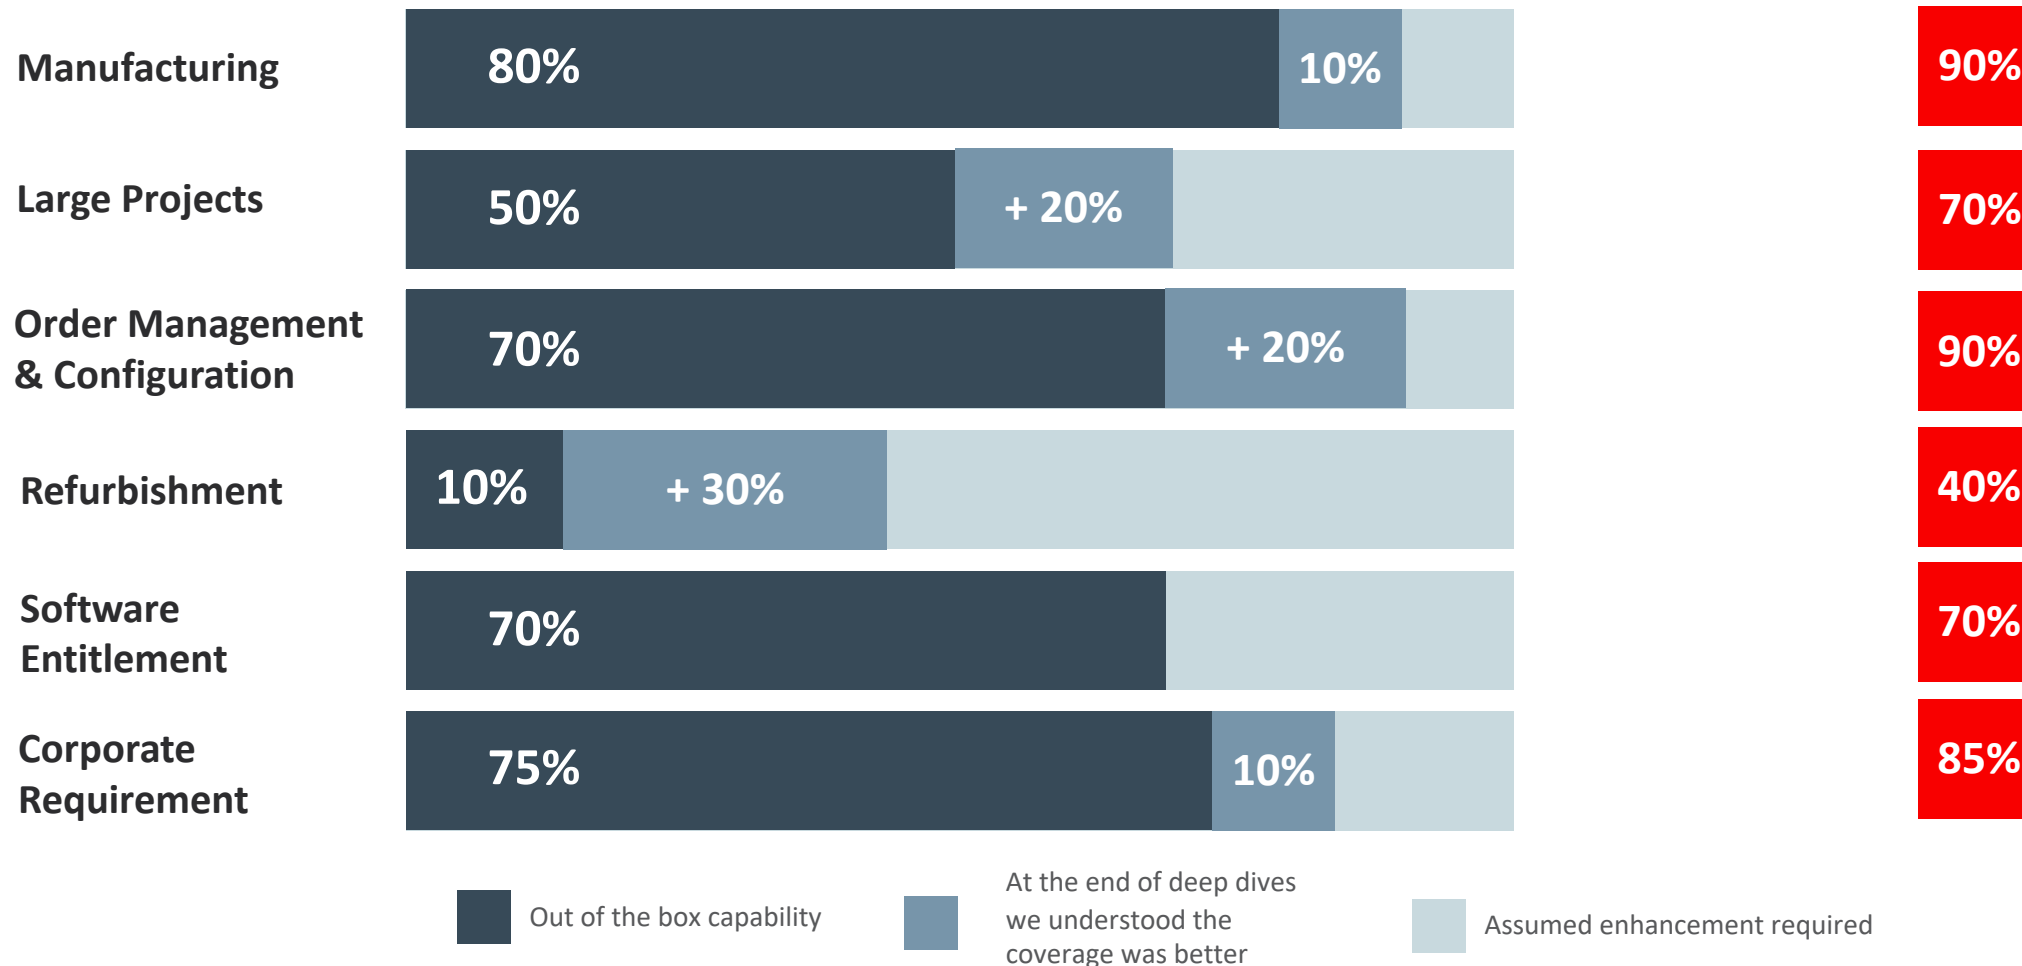

**But it will never stand still.**

**We are committed to delivering what you need,  
and bridging any gaps on top of our roadmap**

# Deep Dive Fit – Current Support (End May '19)

Our product fit assessment at the end of Deep Dives with better understanding

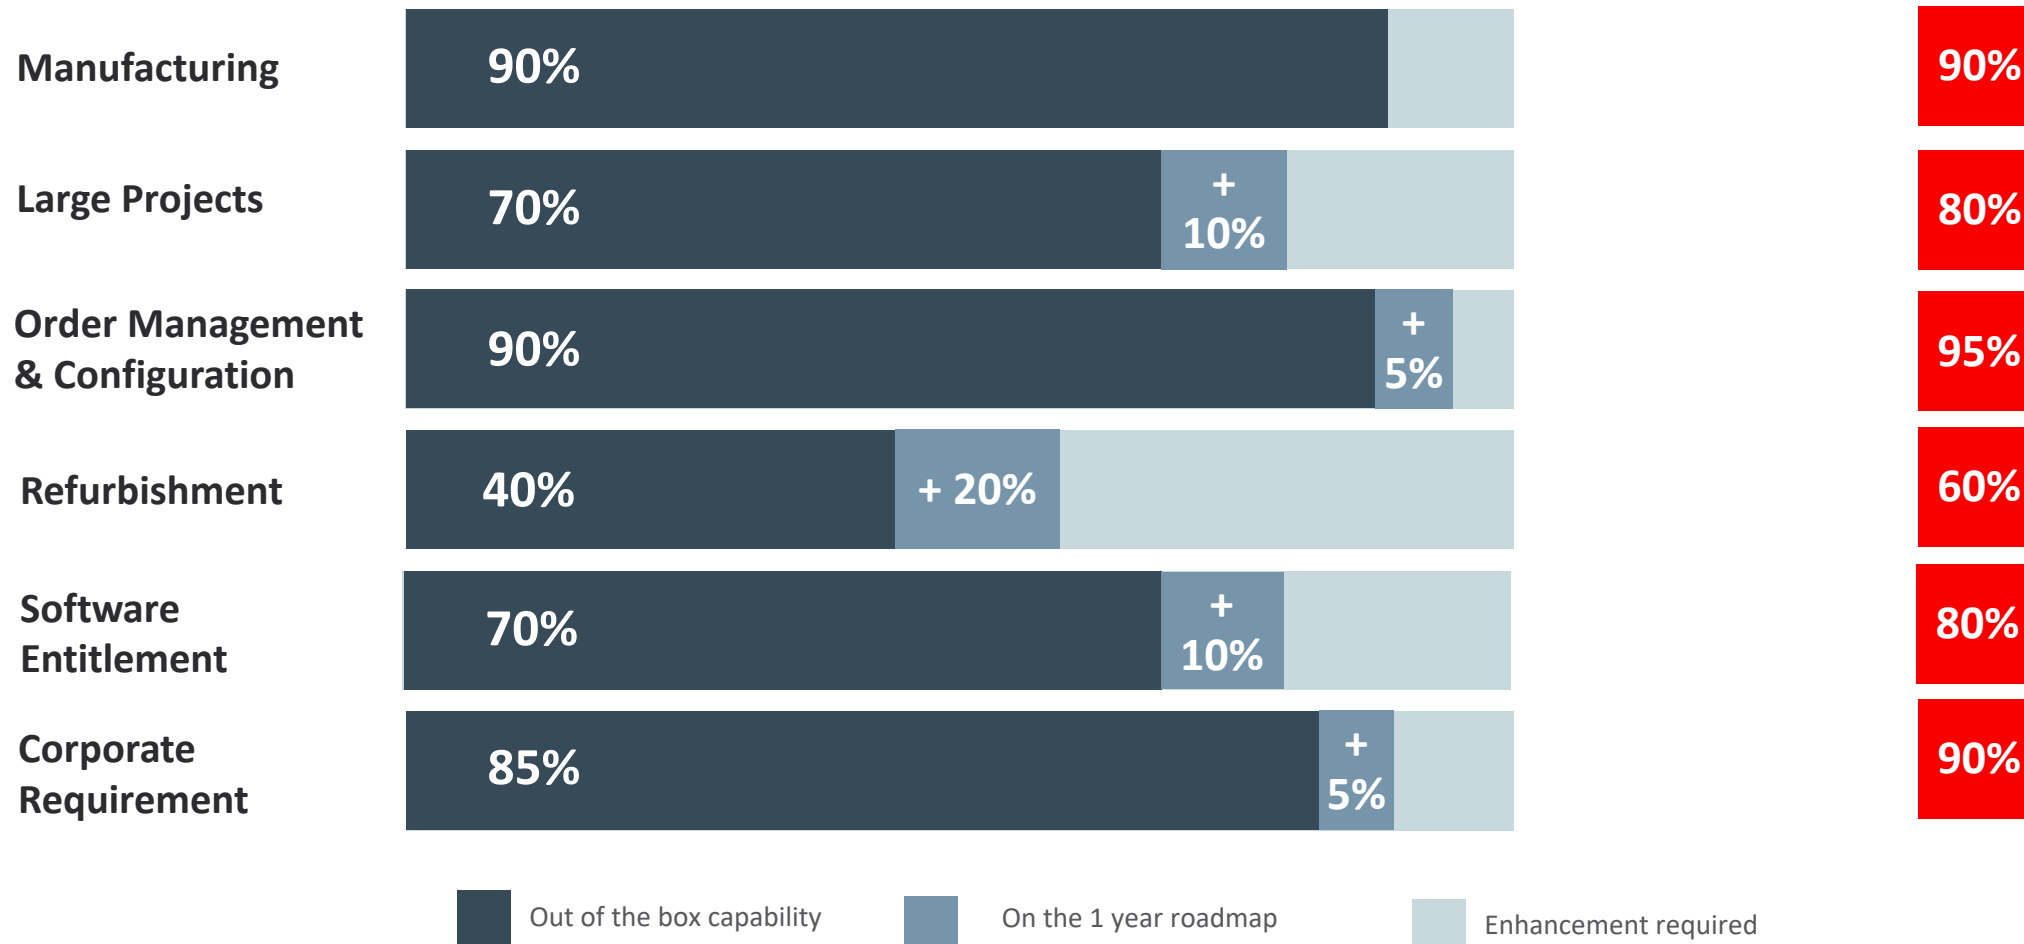

Current Release 19B Fit

# Deep Dive Fit – 1 Year Roadmap Support

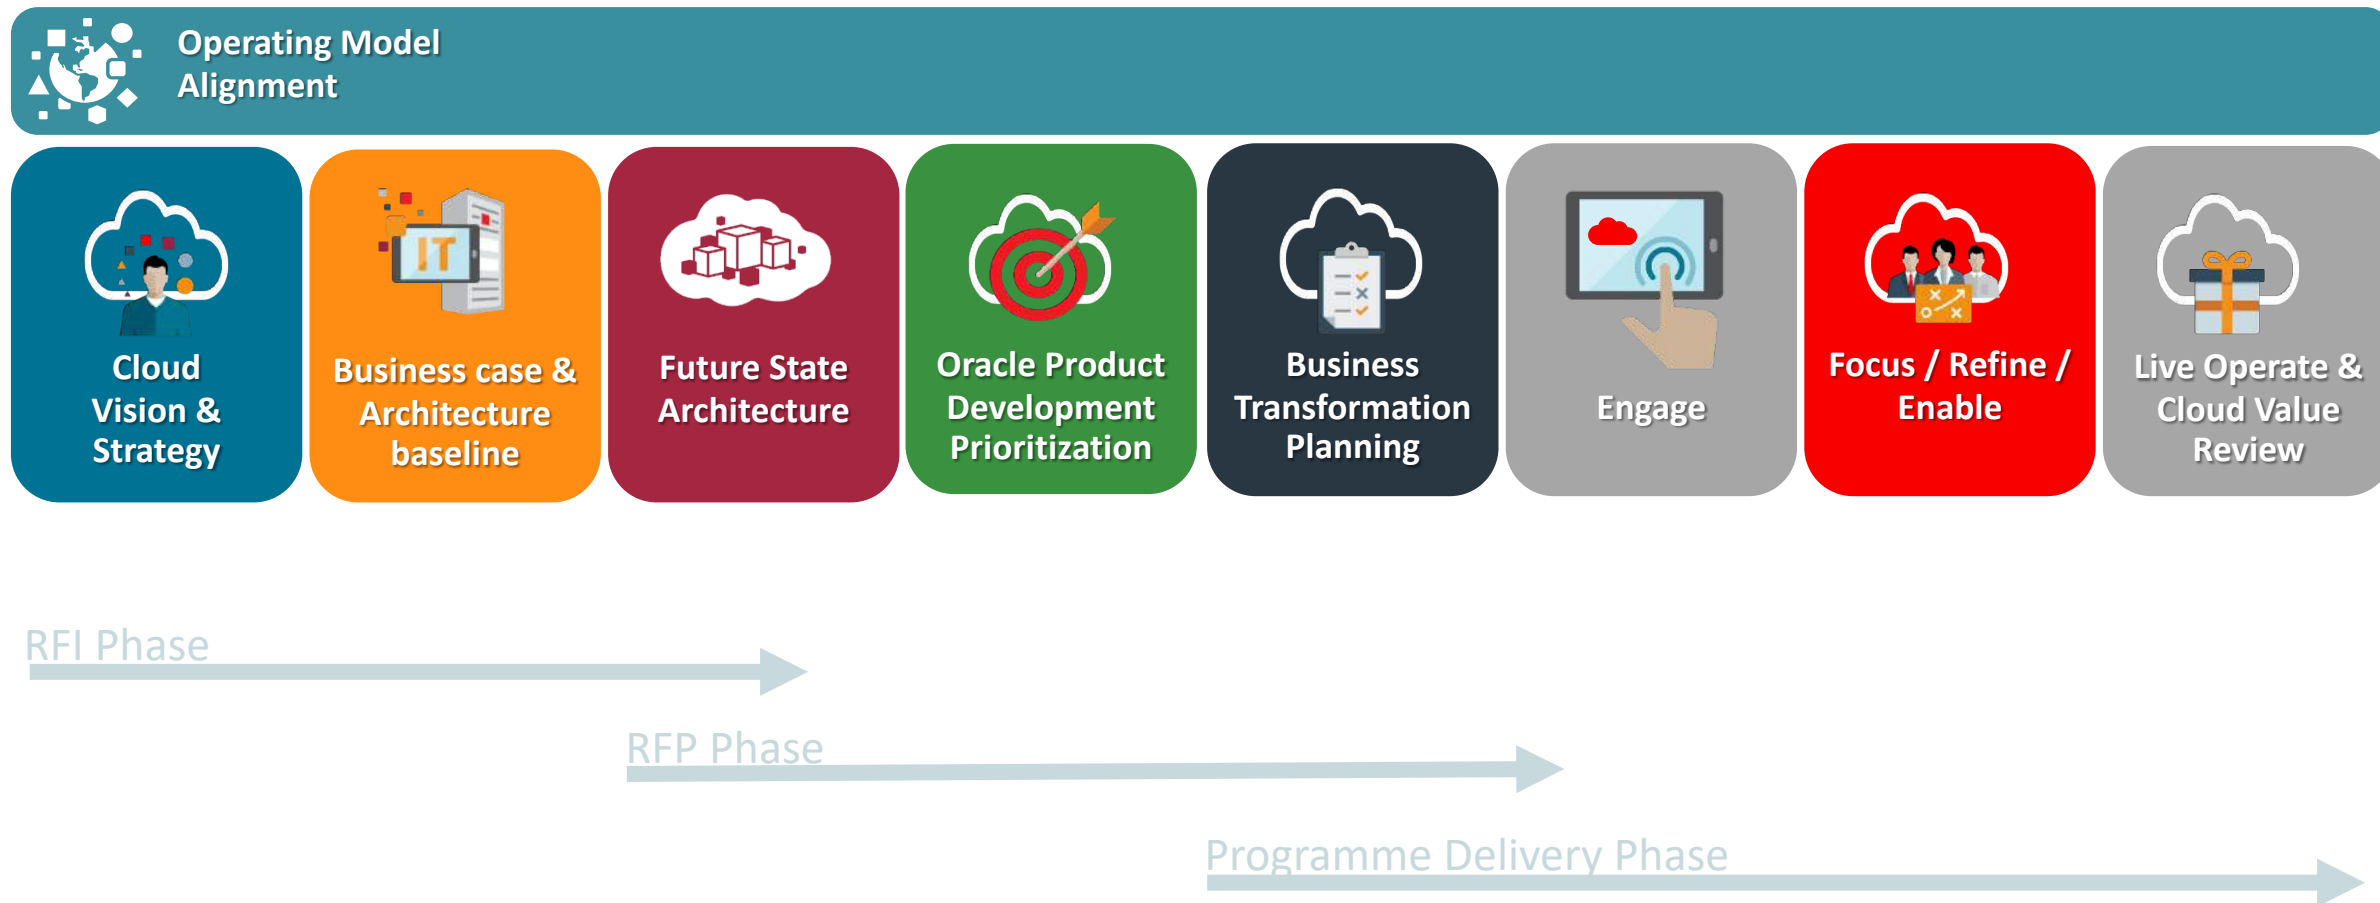

Additional functional coverage planned within next 12 months

Release 19D Fit

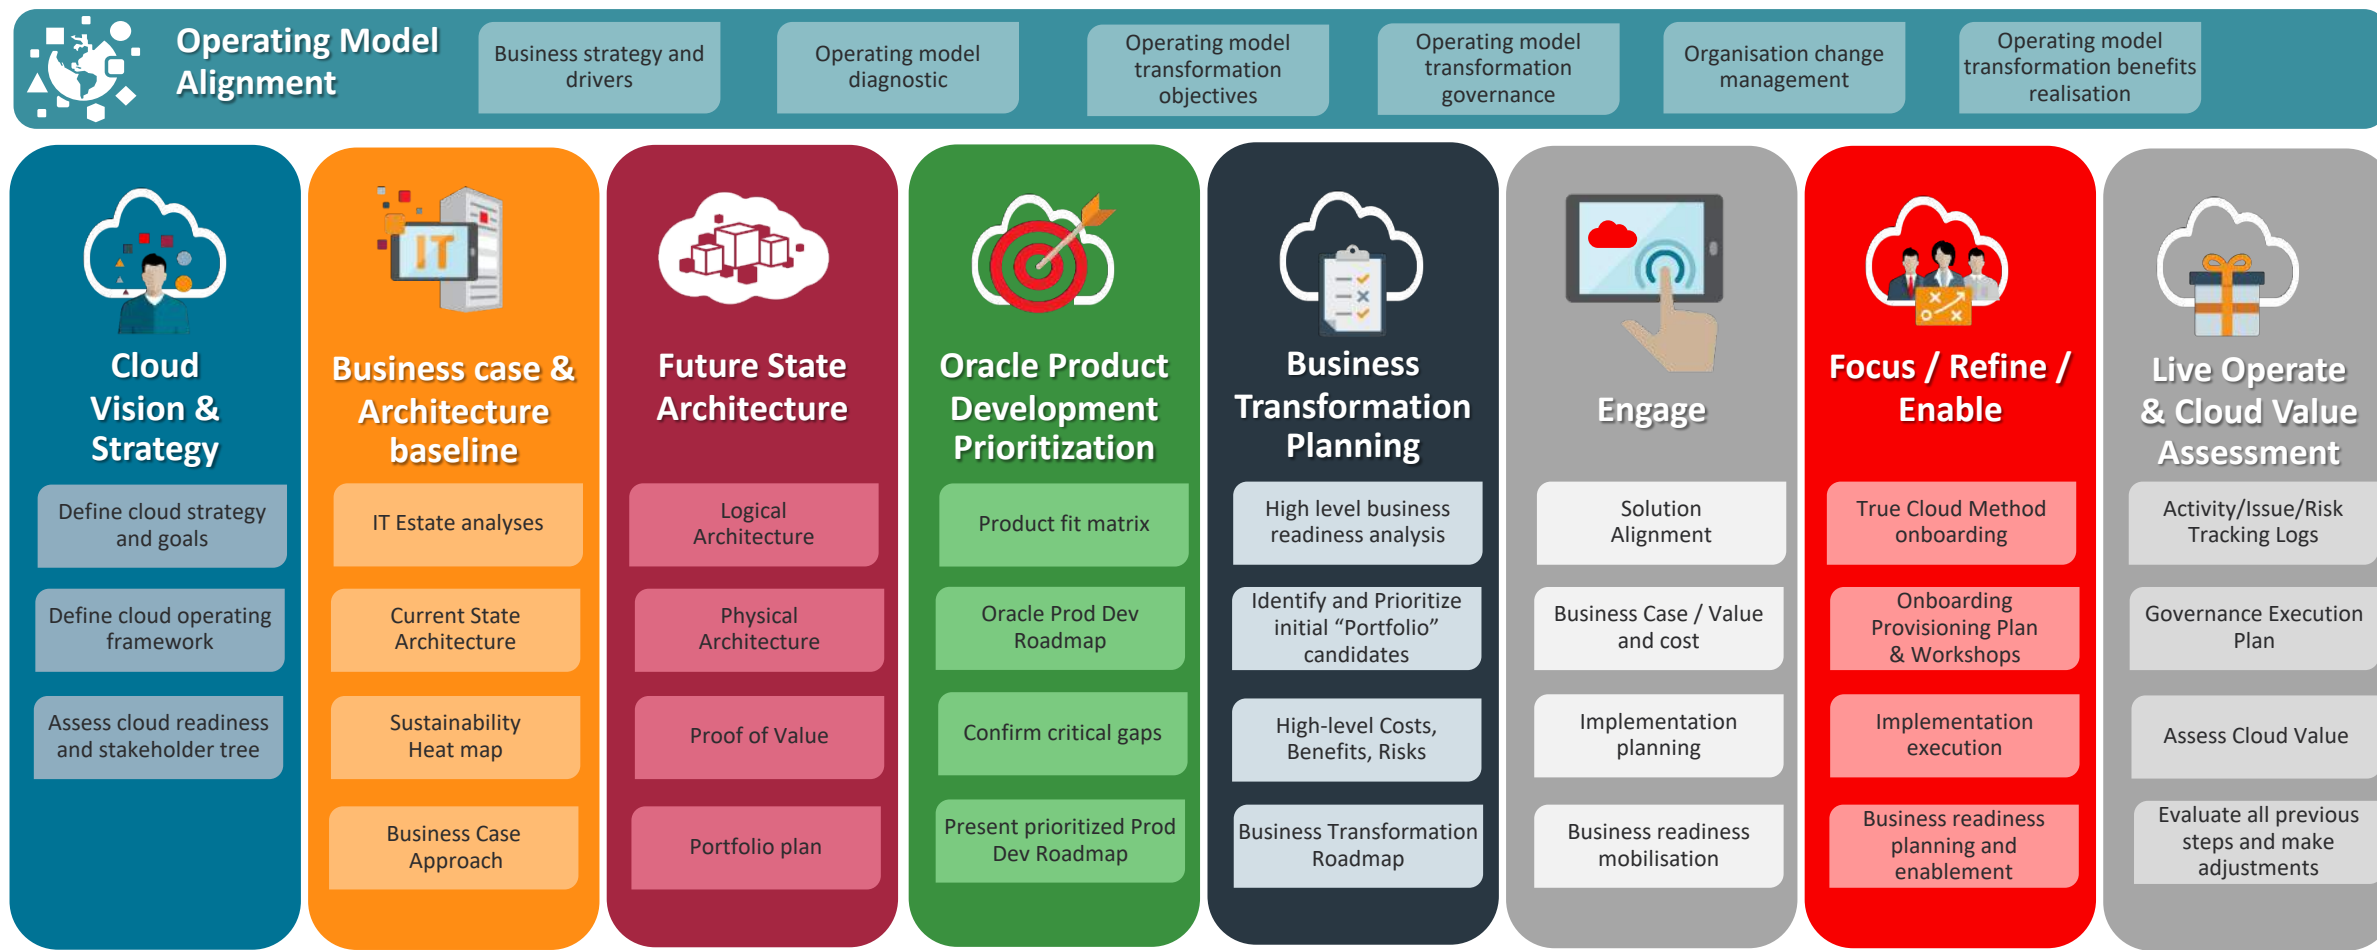

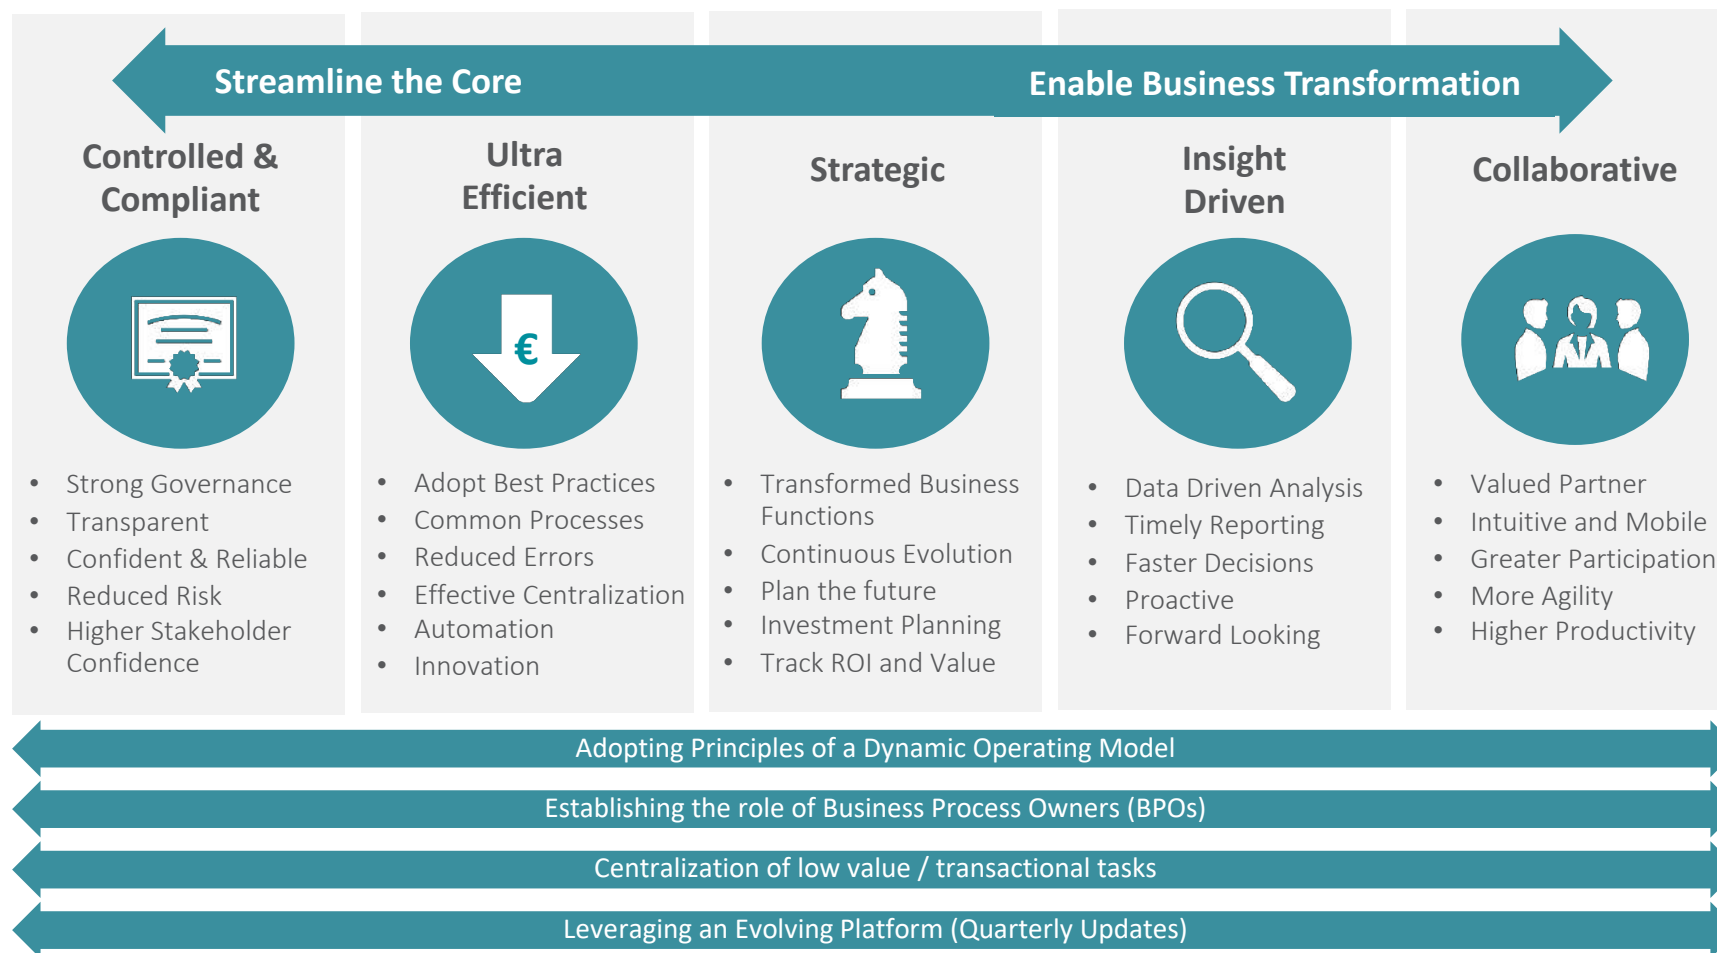

# Business transformation approach – activities

# Business transformation approach – activities

# Dynamic operating model

**ENABLING YOU TO  
ACHIEVE A DYNAMIC  
OPERATING MODEL**

Realising value at every  
stage, giving you even  
greater control

Dynamic operating model  
building blocks

# Driving towards your success with agility and ingenuity, **together**

Working together, we will support your transformation through our platform with a rolling roadmap of continuous innovation, delivery and change.

The Oracle logo is displayed in white capital letters on a red rectangular background in the bottom left corner. The background of the entire slide features a night cityscape with glowing blue arcs and points representing a network or data flow, set against a teal gradient sky.
